Professional Summary

Senior Android Engineer and Technical Lead with 5+ years of experience building, scaling, and architecting high-traffic consumer mobile applications. Led a team of 20+ engineers and designed company-wide MVVM/MVI modular architecture adopted across multiple products. Delivered and maintained apps with 75M+ cumulative installs, including a flagship 15M+ app built from scratch and a 58M+ install legacy app re-architected for stability and scalability. Expertise in Kotlin, Clean Architecture, and performance optimization; delivered large-scale Play Store apps with 99.99% crash-free reliability.

Technical Skills

Languages: Kotlin, Java

Architecture: MVVM, MVI, Clean Architecture, Multi-Module, SOLID, Repository Pattern

Android Jetpack: Compose, Material 3 ViewModel, LiveData/Flow, Navigation, Room, WorkManager, DataStore

Networking: Retrofit, REST APIs, Coroutines, Paging

Backend & Cloud: Firebase (Auth, Firestore/Realtime DB, FCM, Remote Config, Analytics, Crashlytics, Storage)

Monetization: AdMob, In-App Billing, Play Console optimization

Performance: Memory optimization, ANR reduction, startup optimization, large-scale debugging

Tools: Git, Gradle, Proguard/R8, Play Console

Leadership: Code reviews, mentoring, architecture design, standards enforcement, technical planning

Professional Experience

Technical Lead / Senior Android Engineer

HyperSoft Tech | Islamabad | Mar 2022 – Present

Own architecture, scalability, and technical direction for multiple consumer Android applications with millions of users.

- Led and mentored **20+ Android engineers**, conducting code reviews, debugging sessions, and technical training
- Designed and enforced **company-wide base architecture**, evolving from MVC → MVVM → MVI with modular Clean Architecture
- Standardized project structure, reusable utilities, and engineering guidelines adopted across all new apps
- Helped scale Android team growth from **4** → **25+ engineers** through shared base modules and onboarding standards
- Architected and shipped **10+ production apps** from scratch on Google Play

Reliability & Scale

- Maintained **99.99% crash-free rate** across major apps using Crashlytics monitoring and proactive issue resolution
- Managed releases, production debugging, ANR/crash triage, and hotfix deployments for apps with millions of active users
- Optimized performance for media-heavy apps (image/video processing, large bitmaps, background tasks)

Key Product Impact

- **Photo Touch – AI Photo Editor:** Built from scratch, scaled to **15M+ installs**, 77k+ reviews
- **All Languages Translator:** Re-architected legacy **58M+ install** app to MVVM; improved maintainability and stability; supported continued growth (+4M installs during ownership)
- **Video Downloader apps:** Multiple variants reaching **6M+ combined installs**
- **Remote, Recovery & Utility apps:** Several products exceeding **500k+ installs each**

Monetization & Analytics

- Integrated AdMob, Remote Config, Analytics, and Crashlytics across all apps
 - Controlled ad strategies, feature rollouts, and stability monitoring at scale
-

Android Developer

AI-Hassan IT Solutions | Apr 2021 – Dec 2021

Sole Android engineer delivering multiple client applications end-to-end.

- Built and shipped several production apps including live streaming (Agora), real-time chat, and service-provider platforms
 - Implemented Firebase backend solutions (Auth, Realtime DB, FCM, Storage)
 - Developed Google Maps-based features including routing, tracking, and geolocation services
 - Delivered fast-turnaround projects for international freelance clients
-

Junior Android Developer

TechnoSofts Tech | Sept 2020 – Mar 2021

- Developed WooCommerce-based e-commerce Android app using REST APIs
 - Built GPS navigation and routing apps using Google Maps + Snap-to-Road APIs
 - Implemented Material UI with MVC architecture
-

Selected Products (Google Play)

- **Photo Touch – AI Photo Editor — 15M+ installs** | Built from scratch
Developed full architecture, collage/editing/filter features using MVVM; scaled and maintained high-performance app.
 - **All Languages Translator — 58M+ installs** | Re-architected legacy app
Migrated to MVVM, improved maintainability and stability; contributed **+4M installs** during ownership; maintained **99.99% crash-free rate**.
 - **All Video Downloader & Saver — 7.5M+ installs** | Built from scratch
Designed high-performance media download and management features; integrated ads and analytics.
 - **Utility & Tools Apps (Remote, Recovery, Roku, Media, etc.) — 500k+ installs each**
Architect, shipped, and maintained multiple tools with modular architecture and optimized performance.
-

Education

BS Computer Science

University of Gujrat

CGPA: **3.31 / 4.00**

Graduated: 2019
